PT. ANUGRAH SUKSES MINING

Job Title: **Data Engineer**

We are seeking a highly skilled and experienced Data Engineer to join our Big Data project team. The ideal candidate will have a minimum of 2 years of experience in the field, with mastery of the Google Cloud platform.

Responsibilities:
- Design, build, and maintain data processing systems using Google Cloud platform technologies such as BigQuery, Dataflow, and Data Fusion
- Develop and implement data pipelines for data ingestion, transformation, and loading
- Build scalable and robust data architectures for our Big Data project
- Collaborate with cross-functional teams, including data analyst, business analysts, and mining engineers to design and implement data solutions
- Optimize and monitor data processing systems to ensure high performance and availability
- Develop and maintain documentation, standards, and best practices for data engineering processes

Requirements:
- Bachelor's degree in Computer Science, Engineering, or related field
- Minimum of 2 years of experience as a Data Engineer
- Strong proficiency in Google Cloud platform technologies, including BigQuery, Data Fusion, and Dataflow
- Experience with data modeling, ETL, and data integration techniques
- Strong programming skills in Python, Java, or Scala
- Familiarity with SQL and relational databases
- Excellent problem-solving and analytical skills
- Strong communication and collaboration skills

Perks & Benefits:
- Competitive salary
- Comprehensive health, dental, and vision insurance
- Paid time off and holidays
- Professional development opportunities, including career growth, training and conferences
- Collaborative and supportive team environment
- Opportunities for advancement and growth within the company
- Casual dress code
- Company social events and activities
- Work at Top Nickel Mining Company

If you are a highly motivated and skilled Data Engineer looking to take your career to the next level, please fill the application form here: https://forms.gle/a4pV9zV1KN8kMvsu8

Job Title: **Data Analyst**

We are seeking a highly skilled and experienced Data Analyst to join our Big Data project team. The ideal candidate will have a minimum of 2 years of experience in the field, with mastery of the Google Cloud platform.

Responsibilities:
- Analyze and interpret large and complex data sets using Google Cloud platform technologies such as BigQuery and Data Studio/Looker
- Develop and maintain dashboards, reports, and visualizations to communicate insights to stakeholders
- Collaborate with cross-functional teams, including data engineers, business analysts, and mining engineers to design and implement data solutions
- Use statistical analysis and machine learning techniques to identify trends and patterns in data
- Identify opportunities for process improvement and optimization based on data analysis
- Develop and maintain documentation, standards, and best practices for data analysis processes

Requirements:
- Bachelor's degree in Computer Science, Statistics, or related field
- Minimum of 2 years of experience as a Data Analyst
- Strong proficiency in Google Cloud platform technologies, including BigQuery and Data Studio
- Proficient in SQL and data manipulation techniques
- Experience with statistical analysis and machine learning techniques
- Strong problem-solving and analytical skills
- Excellent communication and collaboration skills

Perks & Benefits:
- Competitive salary
